

## **Jetting Engineer job description**

Values & Talent are working with a family-owned business based in Dorset who work for many high-profile companies within the South / Southwest alongside a strong domestic portfolio. As the company continues to grow my client is looking for an experienced Jetting engineer to join the team.

The Jetting Engineer is responsible for planning, operating, and supervising high-pressure water jetting operations to clean, cut, or prepare industrial equipment and surfaces. The role ensures all jetting activities are carried out safely, efficiently, and in compliance with industry standards, client requirements, and environmental regulations.

### **Responsibilities:**

- Sewer Installations and Connections
- Drain lining, pull in and patch along with re-rounding
- CCTV survey operators, push rod and crawler systems
- Septic tank / treatment plant installations
- Pump installation and servicing
- High Pressure Jetting
- Water main repair and installation, including moling

### **Requirements**

- Proven experience in high-pressure water jetting or industrial cleaning
- Hold a NVQ / City & Guilds
- Must have WJA or equivalent qualification and be able to evidence an industry related
- Must be willing to travel within the region

This is a full-time position 40 hours a week Monday- Friday

Salary is DOE (£35k-60k)

**Benefits**

- Company vehicle
- Company pension contribution
- 20 days holiday + BH
